

SWAT-T Rescue - BLACK

MB10.113

The SWAT-T Rescue Tourniquet™ is a unique and multipurpose dressing. Its name provides a description for usage: Stretch, Wrap, and Tuck, but also the communities for whom it was developed – military and civilian Special Weapons and Tactics teams. These teams operate in an environment that has a high incidence of penetrating trauma, and most (two-thirds) of preventable deaths in the operational environment are from extremity bleeding. This stretch wrap tourniquet is easy to use, highly effective and lightweight. It can be effectively applied in seconds with little or no prior training, making it an ideal addition to all emergency responders kit bags.

Features

SWAT-Tourniquet™ is an efficient tool to control extremity bleeding. It can be applied in limbs, groin, armpits, and even in the neck. Its ease of application is one of its greatest benefits: it can be effectively applied in seconds with little or no prior training. Its lightweight and small size makes this tourniquet essential in the battlefield as well as in any emergency situation. The SWAT-Tourniquet™ allows a more rapid means to control extremity bleeding and allows application higher into the groin and axilla than other tourniquets. Its ease of application is one of its greatest benefits; individuals can effectively apply it in seconds with little to no prior training. At a third of the cost and weight of other combat used tourniquets, this tourniquet should find its way forward with every tactical operator. **PROVEN** SWAT-T™ has been heavily researched and it is field proven. **EASY TO USE** Simple application method. Effectively apply in seconds with little to no prior training. **FLEXIBLE** Effective for self-application. Effective even in wet/bloody conditions. Successes in pediatrics, adults, and canine after other tourniquets failed. **COST-EFFECTIVE** SWAT-T™ is 1/3 of the cost of other market leading tourniquets. **ADDITIONAL BENEFITS** Higher axillary and groin applications! Wider = Safer – Better occlusion at lower pressures! High axillary, Pediatric, and K9 saves after strap/windlass failures!

Technical data

Weight (approx)	0.1 Kg
Dimensions (approx)	2 x 11 x 6 cm
Capacity (Liters) (approx)	0.09
Material	LATEX
Color	BLACK, BLUE, ORANGE
